

# Enhanced Creative & Critical Thinking Skills

Out of the box thinking to be innovative and impactful during Covid & beyond!

**2-DAY TRAINING COURSE**

## WHY TAKE THIS TRAINING COURSE?

Many CEOs, business leaders and senior managers have stated they would like their team members to be better thinkers - to be more creative and critical thinkers in the workplace - and to be stronger when "thinking outside the box". They also share that they see the need to be more like this themselves as well, being more effective thought leaders, change agents, and role models for their teams.

The ability to think critically, creatively, and act with initiative in the workplace are now key skills that can set you apart from those merely "going through the motions". These skills can improve the effectiveness of your business, team, or project.

To help with this often mentioned "soft skills gap" EuroCham Cambodia is proud to launch its highly interactive 2-Day Training Course on "Enhanced Creative and Critical Thinking Skills"!

In particular, you should attend this course if you would like to build a more innovative, thinking team, improve your ability to think outside the box, and to increase your own ability to be innovative in the workplace.

## COURSE OBJECTIVE:

Creative and critical thinking skills (C&CT) are of upmost importance for personal professional development and business success, especially during challenging times. Over two exciting days, you will learn some great tools and processes to help you and your team members become more creative and critical thinkers.
